

## NUCLEIC A CO A IMPORTANT

For Professional Use Only

Read directions completely before using this perm

- Always wear rubber gloves
- DO NOT PERM if hair has breakage, discoloration, poor elasticity or extreme porosity. If hair is very porous but permable, use a pre-wrap such as Zotos Porosity Equalizer.
- DO NOT PERM if scalp has sores, abrasions or any other abnormal conditions.
- DO NOT PERM if client has ever had a reaction to a perm or other cosmetic product.
- Always take a preliminary test curl. DO NOT PERM if hair shows signs of damage.
- DO NOT PERM over henna, metallic salts or color restorers. (*check with legal – needed?*)
- Do not brush, rub or vigorously shampoo scalp before perm.
- Do not drip perm lotion on skin or scalp. If contact occurs, blot (do not rub) with cotton soaked with cool water.
- Avoid contact with eyes. If eye contact occurs, flush thoroughly with cool water and consult a doctor.
- Replace neck towel or cotton band immediately if it becomes wet with lotion.
- Wait 48 hours after perming to shampoo and/or condition hair.
- Wait one week after perming before any hair color.

## DIRECTIONS

### 1. SHAMPOO

Gently shampoo hair with non-moisturizing shampoo and towel dry.

### 2. WRAP –

Block damp hair into sections and wrap. Do not wrap with wave lotion. If hair dries, lightly mist with water. Wrap smoothly with minimal tension.

### 3. APPLY WAVING LOTION

Place cotton around hairline and towel at the nape of neck.

Shake Activator. Pour Activator into Waving lotion and shake gently. Puncture tip of waving lotion with T-pin. Apply lotion, saturating each rod thoroughly and evenly. Place plastic cap over all rods and secure.

HAIR TYPE (Inside)	TEST CURL TIME	PROCESSING TIME
Normal/Fine/Resistant	After 15, minutes then every 5 minutes	20 minutes
Tinted/Highlighted	After 15, minutes then every 5 minutes	15 minutes

### 4. RINSE

Rinse hair thoroughly for at least 5 minutes with warm water. Towel blot each rod thoroughly.

### 5. NEUTRALIZE

Shake neutralizer. Puncture tip with T-pin. Thoroughly saturate each rod. Save ½ oz. (15ml) for later use. Wait 5 minutes. Gently remove rods. Work remaining neutralizer through hair for 1 minute.

**6. RINSE**

Rinse hair thoroughly for 3-5 minutes with warm water. Towel blot. Wait 48 hours before shampooing or conditioning. (*if room*)
